---

- Break downs & Service Calls 24/7
- Parts for Any Brand & Any Model
- Load Tests of any Capacity
- Osha Crane Inspection (Periodic & Frequent)
- Maintenance & PM Programs
- Rail & Runway Surveys
- Crane Modifications, Modernizations, & Upgrades
- Replacement Hoists, Cranes, Jibs, & Lifting Devices
- New Equipment Engineering and Installs
- Safety and Production Recommendations.
- Crane Training and Certification

Goal: Increase business production and decrease operational down time. Provide prompt, professional service, in a safe and timely manner. Build strong working relationship with leading and upcoming companies in the industry.

Osha Inspections: All inspections are guaranteed completed by veteran technicians with a minimum of 2000 hours field experience. Provide a computer generated report followed up with a repair quote if necessary.

Services include:

- Wire ropes/chains for wear and/or damage
- Load blocks, sheaves, hooks, safety latches
- Wheels, wheel gearing, and end truck framework
- Hoist brakes, hoist drum, hoist gearbox, limit switches, and rope guides if applicable
- Travel machinery including motors, gearboxes, and brakes
- Bridge structure (visual only), trolley rails, and runway rails.
- Visual inspection of the runway structure
- Electrical controls and runway electrification.
- Top off oil levels as needed, and lubricate bearings.

We also offer monitoring of windings on crane motors to create a base line for preventive project motor failure.
